

Saffire PRO 10 i/o

20-channel Firewire Interface

Saffire Range | Saffire PRO 10 i/o

➔ Saffire PRO 10 i/o is the ideal Firewire interface or interface expansion, for music recording professionals or enthusiasts in need of a high quality multi-channel recording solution. Saffire PRO 10 i/o delivers higher performance specifications than any other interface in its class.

Eight award-winning pre-amps are combined with two channels of S/PDIF, all fed to and from the DAW via lightning fast Firewire interfacing. Also employed are Focusrite's high performance 24-bit digital converters, ensuring maximum signal quality is maintained throughout the audio path. The hardware features two headphones outputs and a global monitor control with mute and dim options, as well as two instrument inputs instantly accessible on the front fascia, eliminating the need for a separate DI.

Much more than just a high performance breakout box, the Saffire PRO package also includes Focusrite's highly acclaimed Saffire plug-in suite, comprising EQ, Compression, Amp Simulation and Reverb, in both VST and AU format. With all these features and an intuitive software application (SaffireControl PRO) for advanced monitoring options and hardware settings, Saffire PRO is the only choice for tracking and monitoring multiple channels of high quality audio to and from the DAW.

- ⦿ High Quality 10 In / 10 out 24-bit/96kHz bus-powered Firewire Interface
- ⦿ 8 classic Focusrite preamps alongside 8 balanced line outs
- ⦿ Stereo SPDIF i/o and unrivalled A/D and D/A conversion
- ⦿ Operates as your primary interface, or as an expansion to any existing interface*
- ⦿ Suite of Focusrite VST/AU plug-ins (Compression, EQ, Reverb, Amp Sim)
- ⦿ 2 instrument inputs on the front fascia – no need for a separate DI
- ⦿ 2 separate Headphones buses directly available via the front panel
- ⦿ SaffireControl PRO software for advanced monitoring and level control
- ⦿ MIDI In and Out
- ⦿ Front panel Level, Dim and Mute controls assignable to every output
- ⦿ AC3 and DTS surround sound compatibility**

Saffire VST/AU Plug-in Suite

SaffireControl PRO

*Expands your setup within Mac OSX via the core audio aggregate devices mechanism. Operating as an expansion via firewire with 3rd party interfaces on a PC will require 3rd party software that is not included here. Operating multiple Saffire PRO devices requires no extra software for either PC or Mac. For a wealth of information on running multiple interfaces, please visit the Focusrite answerbase – www.focusrite.com/answerbase **Currently not supported within Mac OS X

➔ **SPECIFICATIONS**

Analogue I/O

8 Analogue Inputs (mic/line/inst): 8 x XLR (mic/rear)
8 x TRS Jack (line/inst(1 or 2)/front)
8 Outputs 8 x TRS Jack (rear)

Digital I/O

Stereo S/PDIF 96kHz (RCA phono)

MIDI I/O

1 MIDI In, 1 MIDI Out/Thru
