

# BASS STATION II - Patches

The **Bass Station II** is capable of storing 128 patches. We have designed 70 and loaded these into each Bass Station II at the factory - 64 main sounds and 6 bonus percussion and sound effects. Any of the patches can be edited and overwritten but we suggest you use patch locations 70-127 for storing your own.

Patches 0-9 are designed to showcase a variety of timbres that the Bass Station can produce.

Patches 10-19 are designed to be simpler sounds to use as good starting points for creating your own variations.

To create a sound completely from scratch, select any of the patches 70-127 which contain basic initial values for you to start from.

If you want to reprogram the factory patches at any time then please visit [www.novationmusic.com](http://www.novationmusic.com) to find out how.

Patch no.	Name	Type
